

Discussion Topic: Robotics in the future

1. What is one word that you would use to describe the video you just watched?
2. What kind of jobs/tasks would you like robots to do for you?
3. Are there any jobs/tasks that you don't think a robot should do?
4. We already use robotics in many industries, can you think of some examples? Has this had a positive or negative effect on these industries?
5. Do you think there is a danger in allowing robots to do more for us?
6. Do you think increasing robotics use in the future would make our society better?
7. Would you ever want to have your own robot? Why, or why not?
8. Do you think increasing the use of robotics will result in high unemployment rates? If yes, from what industries?
9. From a marketing perspective, how would you convince people to accept the use of robotics in our society? (for example: how would you sell a household robot?)
10. Many people are hesitant or afraid of the idea of more robotics in the future, what do you think drives this fear?
11. (write your own question)
12. (write your own question)
