

Ecology: Assignment #1

For this assignment you will do some research about adaptations. You will write one paragraph (8-10 sentences) describing an organism that has adapted to the situations below. You will write 4 paragraphs in total; each paragraph must be about a different organism.

1. Adaptation driven by temperature
2. Adaptation driven by water
3. Adaptation driven by nutrients
4. Adaptation driven by social interactions

Important things to remember:

- write full sentences
- write your English name and student number on the top of your assignment
- assignments must be typed (check for spelling and grammar mistakes!)
- DO NOT PLAGERIZE!!!** If you copy someone else's work (from a classmate/Internet/book) you will automatically get a mark of **0%** on this assignment.

Due Date: October 23rd
--

Late assignments will only be accepted for 5 days after the original due date

5% will be deducted for each late day.
